Tents and Canopies

Practical as well as festive, a tent or canopy presents the opportunity to create a unique setting for your event. Versatility is almost unlimited; size, configuration, ambiance, and site are yours to select. Facilities may be custom-designed for every type of private, commercial, and institutional event.

Connecticut Rental's experienced consultants will assist and advise you on space requirements, square footage needs and desirable options. Expert installers will efficiently erect, and later remove, your tent and equipment. All the relevant accessories are available: liners, decor, lighting, side walls, and more.

Please Note: To reserve your tent, a 50% deposit is required. This deposit will be applied towards the balance. While an estimated price may be quoted prior to site inspection, final pricing will be determined after a site survey.

SITE SURVEY AND SAFETY

The purpose of an on-site survey is to ensure a requested tent will fit the renter's needs (and space) prior to our crew's arrival at the site. To ensure the safety of the tent erection crews and the tent renter, before a tent can be erected, the following conditions must be determined.

1. LOCATION- After the proper tent size and style has been determined, a desirable location will be chosen for the tent.
 - a. The minimum area required for a pole tent is 16' in length and width more than the actual tent size. This allows 8' around the tent for all the stakes.
 - b. The minimum area required for a frame tent is approximately 4' in length and width more than the actual tent size. This allows for 2' around all sides for stakes or water barrels.
2. UNDERGROUND- It is the renters responsibility to locate all possible under ground utilities that may be located in or around the specified tent area.
 - a. Utilities include, but are not limited to, water, gas, oil, electric, communications, sewer, sprinklers, etc.
 - b. If any utilities are expected to be in the area you must call "Call Before You Dig" at (800) 922-4455 or 811 to mark the area. The service must be notified 7-21 days prior to the installation.
 - c. Connecticut Rental Center cannot be held responsible for damage done to underground sprinkler systems. If the renter provides a schematic, detailing the system's layout, we will do our best to not puncture the lines with our stakes.
3. OVERHEAD- Visually check the specified area for any and all overhead obstructions that could possibly be in the area of the erected tent. This includes tree limbs, branches, power lines, basketball hoops ,etc.
4. SURFACE- Surface is also important in determining the proper type of anchor. Listed below are the 3 main types of surface conditions and the standard methods or anchoring

Grass = Staked, Asphalt = Staked or Water Barrels, Concrete = Staked or Water Barrels or Anchors
