NOTE: For latest version of all Manuals (and replacements), download the
Manuals from Maxon's website at www.maxonlift.com.

WARRANTY/ RMA POLICY & PROCEDURE

LIFTGATE WARRANTY

Type of Warranty: Full Parts and Labor

Term of Warranty: Standard Liftgates - 2 years from ship date or 6,000 cycles
Premium Liftgates - 2 years from ship date or 10,000 cycles

This warranty shall not apply unless the product is installed, operated and maintained in accordance with MAXON Lift's specifications as set forth in MAXON Lift's Installation, Operation and Maintenance manuals. This warranty does not cover normal wear, maintenance or adjustments, damage or malfunction caused by improper handling, installation, abuse, misuse, negligence, or carelessness of operation. In addition, this warranty does not cover equipment that has had unauthorized modifications or alterations made to the product.

MAXON agrees to replace any components which are found to be defective during the first 2 years of service, and will reimburse for labor based on MAXON's Liftgate Warranty Flat Rate Schedule. (Copy of the Flat Rate is available at www.maxonlift.com.)

All warranty repairs must be performed by an authorized MAXON warranty facility. For any repairs that may exceed \$500, including parts and labor, MAXON's Technical Service Department must be notified and an "Authorization Number" obtained.

All claims for warranty must be received within 30 Days of the repair date, and include the following information:

1. Liftgate Model Number and Serial Number
2. The End User must be referenced on the claim
3. Detailed Description of Problem
4. Corrective Action Taken, and Date of Repair
5. Parts used for Repair, Including MAXON Part Number(s)
6. MAXON R.M.A. # and/or Authorization # if applicable (see below)
7. Person contacted at MAXON if applicable
8. Claim must show detailed information i.e. Labor rate and hours of work performed

Warranty claims can also be placed online at www.maxonlift.com. Online claims will be given priority processing.

All claims for warranty will be denied if paperwork has not been received or claim submitted via Maxon website for processing by MAXON's Warranty Department within 30 days of repair date.

All components may be subject to return for inspection, prior to the claim being processed. MAXON products may not be returned without prior written approval from MAXON's Technical Service Department. Returns must be accompanied by a copy of the original invoice or reference with original invoice number and are subject to a credit deduction to cover handling charges and any necessary reconditioning costs. **Unauthorized returns will be refused and will become the responsibility of the returnee.**

Any goods being returned to MAXON Lift must be pre-approved for return, and have the R.M.A. number written on the outside of the package in plain view, and returned freight prepaid. All returns are subject to a 15% handling charge if not accompanied by a detailed packing list. Returned parts are subject to no credit and returned back to the customer. Defective parts requested for return must be returned within 30 days of the claim date for consideration to:

MAXON Lift Corp.
10321 Greenleaf Ave., Santa Fe Springs, CA 90670
Attn: RMA#___

MAXON's warranty policy does not include the reimbursement for travel time, towing, vehicle rental, service calls, oil, batteries or loss of income due to downtime. Fabrication or use of non Maxon parts, which are available from MAXON, are also not covered.

MAXON's Flat Rate Labor Schedule takes into consideration the time required for diagnosis of a problem.

All Liftgates returned are subject to inspection and a 15% restocking fee. Any returned Liftgates or components that have been installed or not returned in new condition will be subject to an additional reworking charge, which will be based upon the labor and material cost required to return the Liftgate or component to new condition.

PURCHASE PART WARRANTY

Term of Warranty: 1 Year from Date of Purchase.

Type of Warranty: Part replacement only. MAXON will guarantee all returned genuine MAXON replacement parts upon receipt and inspection of parts and original invoice.

All warranty replacements parts will be sent out via ground freight. If a rush shipment is requested, all freight charges will be billed to the requesting party.

SUMMARY OF CHANGES: M-12-22, REVISION D

PAGE	DESCRIPTION OF CHANGE
COVER	Updated REV, date of release.
15	Removed Amsoil from Recommended Hydraulic Oils Table
145	Corrected valve callouts in FIG. 145-1
147	Changed Valve D pressure setting to 2400 PSI on Hydraulic Schematic with Power Closer.

Comply with the following **WARNINGS** and **SAFETY INSTRUCTIONS** while maintaining Liftgates. See Operation Manual for operating safety requirements.

WARNING

- Do not stand, or allow obstructions, under the platform when lowering the Liftgate. **Be sure your feet are clear of the Liftgate.**
- Keep fingers, hands, arms, legs, and feet clear of moving Liftgate parts (and platform edges) when operating the Liftgate.
- Correctly stow platform when not in use. Extended platforms could create a hazard for people and vehicles passing by.
- **Disconnect Liftgate power cable from battery** before repairing or servicing Liftgate.
- If it is necessary to stand on the platform while maintaining the Liftgate, keep your feet and any objects clear of the inboard edge of the platform. Your feet or objects on the platform can become trapped between the platform and the Liftgate housing cover.
- Recommended practices for welding on steel parts are contained in the current **AWS (American Welding Society) D1.1 Structural Welding Code - Steel**. Damage to Liftgate and/or vehicle, and personal injury could result from welds that are done incorrectly.
- Recommended practices for welding on aluminum parts are contained in the current **AWS (American Welding Society) D1.2 Structural Welding Code - Aluminum**. Damage to Liftgate and/or vehicle, and personal injury could result from welds that are done incorrectly.

SAFETY INSTRUCTIONS

- Read and understand the instructions in this **Maintenance Manual** before performing maintenance on the Liftgate.
- Before operating the Liftgate, read and understand the operating instructions in **Operation Manual**.
- Comply with all **WARNING** and instruction decals attached to the Liftgate.
- Keep decals clean and legible. If decals are illegible or missing, replace them. Free replacement decals are available from **Maxon Customer Service**.
- Consider the safety and location of bystanders and location of nearby objects when operating the Liftgate. Stand to one side of the platform while operating the Liftgate
- Do not allow untrained persons to operate the Liftgate.
- Wear appropriate safety equipment such as protective eyeglasses, faceshield and clothing while performing maintenance on the Liftgate and handling the battery. Debris from drilling and contact with battery acid may injure unprotected eyes and skin.
- Be careful working by an automotive type battery. Make sure the work area is well ventilated and there are no flames or sparks near the battery. Never lay objects on the battery that can short the terminals together. If battery acid gets in your eyes, immediately seek first aid. If acid gets on your skin, immediately wash it off with soap and water.

MAXON[®]

11921 Slauson Ave. Santa Fe Springs, CA. 90670 (800) 227-4116 FAX (888) 771-7713

- If an emergency situation arises (vehicle or Liftgate) while operating the Liftgate, release the control switch to stop the Liftgate.
- A correctly installed Liftgate operates smoothly and reasonably quiet. The only noticeable noise during operation comes from the power unit while the platform is raised. Listen for scraping, grating and binding noises and correct the problem before continuing to operate Liftgate.
- Use only **Maxon Authorized Parts** for replacement parts. Provide Liftgate model and serial number information with your parts order. Order replacement parts from:

THIS PAGE INTENTIONALLY LEFT BLANK

LIFTGATE TERMINOLOGY

PERIODIC MAINTENANCE PERIODIC MAINTENANCE CHECKS

WARNING

Never operate the Liftgate with parts loose or missing.

NOTE: Photocopy the PM CHECKLIST on the next page to help keep track of periodic maintenance on the Liftgate. Keep completed form with maintenance records.

Annually

Visually check the entire Liftgate for excessively worn parts and broken welds, especially the hinge pins. See **Parts Manual** for replacement parts. Also, do the **Semi-annual** and **Quarterly Maintenance** checks.

Semi-annually

Visually check the platform hinge pins for excessive wear and broken welds. See **Parts Manual** for replacement parts. Also, do the **Quarterly Maintenance** checks.

Quarterly

Check the hydraulic fluid level in the pump reservoir. Refer to the **CHECKING HYDRAULIC FLUID** procedure in the **PERIODIC MAINTENANCE** section.

- If hydraulic fluid appears contaminated, refer to the **CHANGING HYDRAULIC FLUID** procedure on following page.
- Keep track of the grade of hydraulic fluid in the pump reservoir. Never mix two different grades of fluid.
- Check lines and fittings for chaffing and fluid leaks. Replace if necessary.
- Check electrical wiring for chaffing and make sure wiring connections are tight and free of corrosion. **MAXON** recommends using dielectric grease on all electrical connections.
- Check that all **WARNING** and **instruction decals** are in place and legible.
- Check for loose or missing nuts, bolts, covers, roll pins, screws and pins.
- Check that platform latch and transit hook mechanisms work correctly and no parts are missing.

CAUTION

Damaged cylinder seals and contaminated hydraulic fluid can result from painting the polished portion of the cylinder rod. To prevent damage, protect the exposed polished portion of the cylinder rod while painting.

- Check for rust and oily surfaces on Liftgate. If there is rust or oil on the Liftgate, clean it off. Touch up the paint where bare metal is showing.

PREVENTATIVE MAINTENANCE (PM) CHECKLIST

PM Interval: 3 Months

Date: ____ / ____ / ____

Equipment: _____

W/O # _____

Location: _____

Mechanic: _____

Serial # _____

Model # _____

Check Appropriate Box. "☐"

MAXON 1 st , 2 nd and 3 rd Quarter Liftgate Preventative Maintenance (PM) Procedures				
☐ Satisfactory	☐ Repair Required	☐ Corrected	1	Verify if the Quarterly or Annual PM is due by checking the PM sticker on the curbside Liftgate column.
☐ Satisfactory	☐ Repair Required	☐ Corrected	2	Check for oil leaks at: cylinders, valves, and fittings.
☐ Satisfactory	☐ Repair Required	☐ Corrected	3	Check for damage: platform, column, runners and hydraulic tubes.
☐ Satisfactory	☐ Repair Required	☐ Corrected	4	Check for loose or missing nuts, bolts, covers, roll pins, screws and pins.
☐ Satisfactory	☐ Repair Required	☐ Corrected	5	Check for cracked welds at: columns, runners, platform, main housing and vehicle door frame.
☐ Satisfactory	☐ Repair Required	☐ Corrected	6	Check platform lowering speed: Range is 16 - 30 seconds. Check cylinder lock valves for proper operation.
☐ Satisfactory	☐ Repair Required	☐ Corrected	7	Check platform pins and couplers.
☐ Satisfactory	☐ Repair Required	☐ Corrected	8	Check platform raising speed: Range is 12-13 seconds.
☐ Satisfactory	☐ Repair Required	☐ Corrected	9	Check that platform unlatches, unfolds & folds smoothly & latches securely.
☐ Satisfactory	☐ Repair Required	☐ Corrected	10	Check switches and wiring connections on Liftgate as well as pump inside main housing. Also check ground straps.
☐ Satisfactory	☐ Repair Required	☐ Corrected	11	Check the gear pump for unusual noise, i.e. squealing or extreme RPM output.
☐ Satisfactory	☐ Repair Required	☐ Corrected	12	Checking Oil Level: gravity down with the platform unfolded and on the ground. Oil level should be as shown in Installation Manual, "CHECKING HYDRAULIC FLUID". Check for contamination, change if needed.
☐ Satisfactory	☐ Repair Required	☐ Corrected	13	Check batteries: load test, corrosion, cables, hold downs and water level.
☐ Satisfactory	☐ Repair Required	☐ Corrected	14	Check all charging and ground cable connections.
☐ Satisfactory	☐ Repair Required	☐ Corrected	15	Complete a new PM sticker and install it on the curbside column of the Liftgate. The next PM date is 3 months from the completed PM date. Indicate on the PM sticker if 1 st , 2 nd , 3 rd or 4 th PM.
☐ Satisfactory	☐ Repair Required	☐ Corrected	16	Check that platform latch and transit hook mechanisms work correctly and no parts are missing.

MAXON 4 th Quarter Liftgate Preventative Maintenance (PM). Note: Includes steps 1-16				
☐ Satisfactory	☐ Repair Required	☐ Corrected	17	Change hydraulic fluid.
☐ Satisfactory	☐ Repair Required	☐ Corrected	18	Inspect wear on slide pads.

For more detailed information, please refer to the product maintenance manuals. Use only genuine Maxon replacement parts for all repairs.

TABLE 13-1

PERIODIC MAINTENANCE

CHECKING HYDRAULIC FLUID

CAUTION

Keep dirt, water and other contaminants from entering the hydraulic system. Before opening the hydraulic fluid reservoir filler cap, drain plug and hydraulic lines, clean up contaminants that can get in the openings. Also, protect the openings from accidental contamination. Never mix synthetic fluids with conventional hydraulic fluids. Hydraulic system must be purged if the fluids are mixed.

NOTE: Liftgate is shipped with **Exxon Univas HVI-13** hydraulic fluid in the hydraulic cylinders. **Exxon Univas HVI-13** hydraulic fluid is recommended for operating temperatures of **-40 to +120° F**. Refer to decal in pump box. Under certain conditions, other brands and grades of oil may be used as substitutes for the recommended oil. Refer to **TABLES 17-1 & 17-2**.

NOTE: If the hydraulic fluid in the reservoir is contaminated, do the **CHANGING HYDRAULIC FLUID** procedure in this section.

1. Open and lower platform to the ground (**FIG. 14-1**). Refer to **Operation Manual** for detailed operating instructions.
2. Unbolt main housing cover as shown in **FIG. 14-1**. Remove cover.
3. Check the hydraulic fluid level in reservoir as follows. With platform on the ground, level should be as shown in **FIG. 14-2**.
4. If needed, add fluid to the reservoir as follows. Remove filler cap (**FIG. 14-2**). Fill the reservoir with hydraulic fluid to level shown in **FIG. 14-2**. Reinstall filler cap.

**UNBOLTING/ BOLTING COVER
(PLATFORM ON THE GROUND)
FIG. 14-1**

CAUTION

Main housing cover must be correctly secured to prevent it from becoming a hazard.

**POWER UNIT FLUID LEVEL
(STANDARD POWER UNIT SHOWN)
FIG. 14-2**

5. Bolt on the main housing cover as shown in **FIG. 14-1**. Torque the 5/16"-18 cover bolts from **10 to 14 lb-ft**.

TABLE 15-2**

PERIODIC MAINTENANCE

CHANGING HYDRAULIC FLUID

CAUTION

Keep dirt, water and other contaminants from entering the hydraulic system. Before opening the hydraulic fluid reservoir filler cap, drain plug and hydraulic lines, clean up contaminants that can get in the openings. Also, protect the openings from accidental contamination. Never mix synthetic fluids with conventional hydraulic fluids. Hydraulic system must be purged if the fluids are mixed.

NOTE: Liftgate is shipped with **Exxon Univis HVI-13** hydraulic fluid in the hydraulic cylinders. **Exxon Univis HVI-13** hydraulic fluid is recommended for operating temperatures of **-40 to +120° F**. Refer to decal in pump box. Under certain conditions, other brands and grades of oil may be used as substitutes for the recommended oil. Refer to **TABLES 15-1 & 15-2**.

1. Open and lower platform to the ground (**FIG. 16-1**). Refer to **Operation Manual** for detailed operating instructions.

**UNBOLTING COVER
(PLATFORM ON THE GROUND)
FIG. 16-1**

2. Unbolt main housing cover as shown in **FIG. 16-1**. Remove cover.

3. Remove drain plug (**FIG. 16-2**). Then, drain hydraulic fluid from reservoir.

4. Reinstall drain plug (**FIG. 16-2**). Then, add new **Univis HVI-13** hydraulic fluid to level shown in **FIG. 16-2**.

5. Remove filler cap (**FIG. 16-2**). Then, add new **Univis HVI-13** hydraulic fluid to level shown in **FIG. 16-2**. Reinstall filler cap.

**POWER UNIT
(STANDARD POWER UNIT SHOWN)
FIG. 16-2**

6. Raise platform to bed height (**FIG. 17-1**). Continue to hold **UP/DOWN** control switch for 30 - 60 seconds to circulate hydraulic fluid through slave cylinder and reservoir (**FIG. 17-2**). Release **UP/DOWN** control switch.

NOTE: Three cycles of draining, filling, and circulating hydraulic fluid should be enough to fill the system with new hydraulic fluid.

7. Repeat **instructions 1 through 5**, two times. Keep the platform open and cover removed.

PLATFORM AT BED HEIGHT
FIG. 17-1

POWER UNIT
(STANDARD POWER UNIT SHOWN)
FIG. 17-2

8. Lower platform to the ground (**FIG. 17-3**).

CAUTION

Main housing cover must be correctly secured to prevent it from becoming a hazard.

9. Bolt on the main housing cover as shown in **FIG. 17-3**. Torque the 5/16"-18 cover bolts from **10 to 14 lb-ft.**

PERIODIC MAINTENANCE

PRESSURIZING HYDRAULIC SYSTEM

CAUTION

Operating Liftgate, under certain conditions, with air in system could result in damage to lift and load as well as personal injury. If lines are opened & closed or replaced, and if power unit or cylinders are replaced, pressurize hydraulic system before operating Liftgate with a passenger or load.

NOTE: When pump pressurizes fluid in hydraulic system, air is bled into reservoir through slave cylinder return line.

Hold the **UP/DOWN** control switch (**FIG. 18-1**) in the **UP** position for 30 - 60 seconds to pressurize hydraulic system and bleed air from system.

FIG. 18-1

TORSION BAR REPLACEMENT & ADJUSTMENT

REPLACE LH TORSION BAR

WARNING

Ensure platform is latched securely in stowed position to release most tension from torsion bar(s) and keep platform from suddenly unfolding. Injury could result from unbolting the torsion bar under tension. When all tension is released from torsion bar(s), platform can unfold suddenly. Any person in the path of opening platform could be injured.

1. Stow platform (**FIG. 19-1**). Ensure platform is latched securely. Refer to **Operation Manual** for detailed operating instructions.
2. Support bottom of platform and flipover evenly on RH and LH sides (**FIG. 19-1**).

SUPPORT
(2 PLACES)

FIG. 19-1

SET SCREW
TORSION
BRACKET

FIG. 19-2

3. On LH runner, adjust the torsion bracket set screw counter-clockwise (**FIG. 19-2**) until there is a small gap between set screw and the torsion bracket (**FIG. FIG. 19-2**). Gap indicates tension is removed from torsion bar.
4. Drive roll pin from pin collar and torsion bar pin (**FIG. 19-3**). Then, remove torsion bar pin, spacer and torsion bar (**FIG. 19-3**).

FIG. 19-3

PERIODIC MAINTENANCE

TORSION BAR REPLACEMENT & ADJUSTMENT - Continued

5. Insert torsion bar pin through LH runner, platform, spacer, and pin collar (**FIG. 20-1**). Then, rotate torsion bar to position shown (**FIG. 20-1**) and depending on platform, engage with torsion bar pin on RH side of platform (**FIG. 20-2**), or engage with torsion bar housing (anchor stop weldment, P/N 285799-01) as shown in **FIG. 20-3**.
6. Line up holes in pin collar and torsion bar pin (**FIG. 20-1**). Secure collar to torsion bar pin with roll pin.
7. Ensure platform is latched securely in stow position. Then, remove platform supports.

FIG. 20-1

FIG. 20-2

FIG. 20-3

ADJUST LH TORSION BAR

WARNING

Platform can unfold suddenly with no tension on torsion bar. Stay out of the path of unfolding platform when adjusting the torsion bar. Get second person to help unlatch platform.

1. Stow platform. Refer to **Operation Manual** for detailed operating instructions.
2. On LH runner, adjust the torsion bracket set screw clockwise until tension is applied to torsion bar (**FIG. 21-1**).
3. Unlatch platform (**FIG. 21-2**). Platform should just escape the latch as shown in **FIG. 21-2, position 1**.
4. Unfold platform until pin is 2"-3" from latch (**FIG. 21-2, position 2**). Release hold on platform to observe if platform starts to fold, stays partially unfolded, or starts falling open with no restraint. Platform should require a little more pull to unfold and should unfold slowly when released (**FIG. 21-2, position 3**). To increase the amount of pull for unfolding platform, adjust the torsion bracket set screw clockwise until increased tension is applied to torsion bar. Once the platform is unfolded, it should lay flat (**FIG. 21-2, position 3**). If the platform does not lay flat, the LH torsion bar must be adjusted for decreased tension. To decrease amount of pull, adjust the torsion bracket set screw counter-clockwise until tension is removed from torsion bar (**FIG. 21-3**). To keep the platform from falling open, adjust set screw clockwise (**FIG. 21-1**) until platform just starts to fold from **position 2** as shown in **FIG. 21-2**.
5. Platform can be stowed or returned to operation after adjustment is done correctly.

INCREASE PULL
FIG. 21-1

FIG. 21-2

DECREASE PULL
FIG. 21-3

PERIODIC MAINTENANCE **TORSION BAR REPLACEMENT & ADJUSTMENT - Continued**

REPLACE RH TORSION BAR (IF EQUIPPED)

1. Stow platform. Refer to **Operation Manual** for detailed operating instructions.
2. Support bottom of platform and flipover evenly on RH and LH sides (**FIG. 22-1**).
3. On RH runner, unbolt the platform and runner pin from RH runner (**FIG. 22-2**).

FIG. 22-1

FIG. 22-2

4. Next, remove roll pin from platform and runner pin (**FIG. 22-2**). Then, remove platform and runner pin (**FIG. 22-2**).
5. Remove torsion bar from torsion bar housing (**FIG. 22-3**).

FIG. 22-3

6. With platform in vertical position, insert the torsion bar into the RH pin weldment, through RH runner, platform spacer and pin collar, and engage with torsion bar housing weldment (**FIG. 23-1**).

FIG. 23-1

7. Rotate the RH pin weldment clockwise to line up the pin weldment holes with the RH runner threaded holes (**FIG. 23-2**).
8. Line up holes in pin collar and torsion bar pin (**FIG. 23-2**). Secure collar to torsion bar with roll pin on both sides of platform.
9. Ensure platform is latched securely in stow position. Then, remove platform supports.
